

Startup and Innovation Cell

Report- 27/07/2019

PICT, Startup and Innovation Cell have organized its first industrial meet of this year to **pitch best ideas for Startup and Entrepreneurship and also for Incubation center**. Agenda is also to explore different possibilities of Industry interface and to accelerate PICT's existing incubation system.

Total 10 student groups and 1 PICT incubatee have presented ideas in front of 6 industry experts. Following are the suggestions given by experts visited:

1. Student groups can allow implementing pitched idea as a final year project, so students will get more time to work on it.
2. College may provide some free/extra time, so students can get more time to do Industry real time projects.
3. College may provide sponsorship for few projects.
4. Encourage students for finding Internship opportunities or allocate Industry mentor for projects.
5. Start certificate courses on current cutting edge technologies which may help students to develop their products.
6. Apply to different government grants or funding agencies for Incubation centre.
